# **WOE UNTO BACHELORS IN LIFE** TO COME, CRIES BISHOP M'INTYRE

KANSAS CITY, March 17—To the bachelor, he who "enjoys single bissedness is to come much woe and sorrow here and hereafter, according to Bishop Robert Meintyre of Denver in a lecture on Buttoned in Paople at the Independence avenue Methodist Church list night. The Bishop believes that the bachelor is sinning against God and is defeating this Divine will.

"Voe unto him who cuts across the grain of God's seneme of the universe. We hear much about single blessedness and the joy of independence, but there is no such thing. The great creater never made a single thing. Everything in the universe has its better other half. Man cannot set himself against God's will and come out of the battle unscathed. The loveless bachelor has boasted of his buttoned-up happiness, but he will serrow for it all. We unto him, I say, but let him beward of the life to come. He is guilty of the black sin."

SACRAMENTO, March 17. The Assembly, at the instance of Assemblyman Mott of Oakland, this morning passed the bill granting one more judge to Alameda county.

The measure as originally passed by the Assembly called for two judges.

It was amended by Senator Stetson in the Senate to provide for one judge only.

The action of the Assembly today concurred in that amendment. The bill will be approved by the Governor, and Judge W.

S. Wells, formerly of the Superior Court of Contra Costa county, but a resident of Oakland for many years, will be appointed to fill the new judgeship.

ASHINGTON, March 17.—Downward revision, maximum and minimum provisions which impose an arrangement. mun duty 20 per cent in excess of the present tariff and numerous provisions by which it is estimated that the revenue to the government will be increased from forty to fifty million dollars are the salient features of the new tariff bill which was introduced in the House today by Representative Sereno E. Payne, chairman of the Ways and Means Committee.

Follows Taft's Recommendations

The recommendations made by President Taft that an inheritance tax be provided and that a limited amount of tobacco and sugar be admitted free from the Philippines are included in the bill.

The measure also provides for the issuance of Panama Canal bonds to the amount of \$40,000,000 to reimburse the treasury for the original purchase of the canal and re-enacts the provisions for the issue of the treasury certificates, the amount being increased from Heorice and cottonseed oil and croto-

A provision of the bill is designed to meet the conditions resulting from the patent laws of Great Britain, which require that patentees must manufacture their articles within Great Britain. This provision applies the same rules to patents taken out in this country by allens as applied to Americans in the country of the allens.

"The last normal year of imports was the fiscal year ending June 30, 1906; 1307 was an unusually prosperous year and the revente from customs exceeded those of 1906 by thirty-two million dollars. The committee have, therefore, taken the year 1906 as the basis to torm their estimate of the revenue-producing qualities of the new bill. Should the next fiscal 30 or prove prosperous and the normal conditions of 1906 return, on account of the large increase of population, the revenues for 1910 would have a considerable increase over the estimates of the committee.

# Panama Bonds

"With a return to anything like normal conditions during the next fiscal year it is safe to predict the deficit would be entirely wiped out, but in case it is not, the bill provides for the issue of Panama Canal bonds to reimburse the treasury for the \$46,000,000 paid out in the original purchase of the canal. This would more than make at any probable deficiency. purchase of the canal. This would more than make up any probable deficiency. There is also re-enacted the provision for the issue of certificates to run one year to repletish the treasury, raising the amount from one hundred million to two hundred and fifty million deliars, an amount su ficient to provide at any time against two or three years of depressed business conditions."

# Proposed Changes

# Men Aid Tariff Revision

WASHINGTON, D. C., March 17.—Fully three hundred importers and exporters, manufacturers and agriculturists, and tariff xperts appeared before the House Committee on Ways and Means at the various hearings which began on November 10th and continue daily until December 23rd, and also at several supplemental hearings. Some of the most prominent men in the manufacturing and financial worlds presented testimony of a varied and interesting character. I addition to this testimony there were thousands of briefs filed with the committee, which added to the statistics furnished by the varies government departments and agents sent abroad, together with special data compiled by Thomas J. Deherty, essistant counsel of the Treasury Department, and Major Herbert M. Lord, who was clerk of the Ways and Means Committee when the Dingley tariff was 'ramed, has given the committee information more complete than his ever been at the disposal of a tariff framing committee.

# Steel Magnates Were There

Andrew Carnegie, Charles H. Schwab, Judge E. H. Gary an other steel magnats furnished the most interecting testimony. Mr. C regie, who caused considerable discussion by proclaiming, in a marticle, that the steel manufacturers of this country do not not any tariff protection, was before the committee for nearly eight how sets the steel manufacturers of this country do not not any tariff protection, was before the committee for nearly eight how sets the steel much specific information regarding the cost of manufacturing steel rails and other articles of steel. He dealt largely in theories and deductions and avoided figures, claiming that he was not familiar with the details of the steel business at the present time, but spoke from his general knowledge guined in the business before the tried to private life.

Judge Gary, who was one of the best equipped and most sitisfactory witnesses who appeared before the committee, preceded Mr. Carnegie by several days. He declared that the independent steel should be removed, the United States Steel Corporation, of whose board of directors he is chairman, would secure a monopoly of the should be removed. The United States Steel Corporation, of whose board of directors he is chairman, would secure a monopoly of the steel was taken off onlinely. In the course of his testimony Judge Gary declared in flavor of government control of manufacturers to revent them from charging a price which would give them more than a fair return on their investments.

# Schwab Wanted Protection

Schwab, who was formerly president of the steel corporation, was one of the most earnest advocates for protection for the steel industry to appear before the committee. His replies to the questions of members of the committee were replete with figures and arguments. He declared that the Bessemer process of steel manufacture will, within five years, be superseded by the open hearth process, which, he predicted, will in turn, be abandoned for the electric system of manufacture being developed in Germany.

The agitation for free lumber by those in sympathy with the movement for the conservation of the forests of the country result in a strong appeal from the lumber interests of the South and the Northwest. Representative Champ Clark of Missouri, the minority leader of the House, submitted the lumber magnates to severe a severaminations and these hearings were among the most interesting. T. B. Walker and Edward Hines, two of the largest lumber dealers in the Northwest, argued for the retention of the present duty on umber, claiming that the United States cannot compete with Canada ifacilities for cheap transportation or cheap labor. A number of S uthern lumbermen also asked for protection, contending that the cost of production has increased.

# Arraigns Paper Trust

A severe arraignment of the so-called paper trust by John Norris, representing the American Newspaper Publishers' Association and a defense of the International Paper Company, by Chester W. yman, assistant to the president of the company, offered one of the sensations of the hearings. The Ways and Means Committee, while taking the keenest interest in the testimony, was predisposed to depend upon the report of the special committee which conducted hearings on wood pulp and print paper last year for the information upon which to base its conclusions regarding the paper and pulp schedule

# Tariff Benefited Packers

Elisha W. Cobb, a manufacturer of heavy leather of Boston Mass., told the committee that the tariff on hides accrued only to the benefit of the packers and not to the farmer and cattle raiser. He lectard that the large packers of Chicago are engaged in the tanning lusiness and look forward to the time when they will have complete manopoly in the hide business and in the sole and upper-leather business. The wool schedule was the question for more contentic than any other and during its consideration there was much criticism of the methods by which tariff bills are framed. While William Whitman of Boston, representing the National Wool Manufacturers, van on the stand, Representative Clark of Misseuri placed in the record a pamphlet which purported to inform the Ways and Means Committee "how tariff laws are framed." The name of the author of the pamphlet was given as Frank P. Bennett of Boston.

# Wanted Higher Duty

The wool growers of Ohio and the Western States declar dephatically to the committee that further protection must be given the industry or the wool-growing business would be entirely wiped out. The California fruit growers were arrayed against the importers, and one argument advanced by the latter for reduced duties on lemons was that the recent earthquake in Sicily had resulted in a scarcity of labor and the destruction of lemon groves. Senator hale appeared before the committee to ask that tapica flour be recially provided for in the bill. Similar requests were made on a nerous articles. The committee found considerable information at s disposal in a volume giving statistics regarding imports and duties prepared by William W. Evans, assistant clerk of the committee. William K. Payne is the clerk of the committee. Lumber Schedule

# Provides Method Of Fixing Values

One of the most important of the miscellaneous provisions of the bill is that providing for the method of valuation, which I'myne expt ims as follows:

"The bill ades a new paragraph to rection 11 of the customs administrative act, which provides for the appraisement of goods imported by consignment and not by saic where there is no market price at the place of the origin of the goods. After re-enacting the present provisions to as artain the value the bill adds this paragraph:

"The actual market value or wholesale price, as designed by law, of any imported merch and I which is consigned for sale in usual windeade quantities in the open market of the country of exportation to all pureausers, shall not in any case be appraised at less than the wholesale price at witch such or similar imported merchandles is actually sold and treely offered for sale in usual wholesale quantities in the United States in the copen market of the country of exportation to all pureausers, shall not in any case be appraised at less than the wholesale price at witch such or similar imported merchandles is actually sold and treely offered for sale in usual wholesale quantities in the United States in the open market to dil purchasers, due allowance by deduction being made for estimated duties thereon, for cost of transportation, insurance and other necessary expenses from the place of shipment to be place of delivery and a reasonable commission not exceeding 16 per centum fany of the same has been paid.

"It will be seen that this provision is only applied to consigned goods and not to those actually sold for importation."

# Further Explanation

Further Explanation

The following explanation of the form of the bill was made by Mr. Payne:

"The new tauff bill is a minimum and maximum tariff bill. The minimum rates if duty are contained in the first section and the free list for the minimum rates is in the second section of the bill. The third section centains the maximum rates which are generally equal to the minimum rates which are generally equal to the minimum rates and 26 per centime and addition thereto and the articles on the free list, in the transfer to the ubled acction, bear a duty of 20 per centime of valorem as a maximum rate. The maximum rate does not so into effect in any event until sixty lays after the passage of the act. By the fourth section the minimum rates are applied to all good terms by way of tariff is that given to any other nation and the maximum rates are applied to those counties which discussinate against the trade of the United States tariff rates as favorable is those given any ether nation. This section is self-acting, making it the duty of the executive to collect the duties whether minimum or maximum, in accordance with the terms of the bill, leaving to pen to the courts to decide upon the legality of the action."

# Island Free Trade

Regarding the miscellaneous provisions of the bill, Payne states;
"The bill provides for reciprocal free trade with the Philippine Islands on all uticles, but limiting the sugar to be imported free of duty to 300,000 tons; wrapher tobace oto 600,000 nounds and 6,000.

orted free of dury to 300,000 tons; wrapborted free of dury to 300,000 tons; wrapbor tobace oto 600,000 pounds and 6,000,000
duay in any one fiscal year. The excess
of sugar, tobac o and eigars to pay full
difference. This exemption from duty
is confined to the growth of products of
he islands, however, and does not admit
tricles imported into the Philippine Isands from a foreign country without
asyment of full fales of duty on such
importations.

"A section is added applying the same
when to patents oblaned in the United
States by allows that are adopted by
it country of which these allones are
citizens in respect to patents issued
here to citizens of the United States.
This will either compel foreigners obaling patents from the United States
of bulld factories and manufacture here
or our trade or eventually forfeit the
eights to their patents.

"A section is inserted preserving the
"Dan reciprocity provisions of the presont law.
"Provision is made to terminate yercuban reciprocity provisions of the present law.

"Provision is made to terminate various commercial agreements with foreign countries according to the terms of said agreements by notice and in the neuntine keeping faith in those agreements. The provisions of section 4, applying the minimum and maximum wars will take the place of these sections.

# \$300,000,000 Revenue

"The established revenue under the tariff duties prescribed in the bill amount to about \$300,000,000.
"The bill provides for a tax on transfers of property, both real and personal by inheritance or succession and by will. It is believed that this provision when in full operation will bring in a revenue of \$20,000,000, although no accurate estimates can be made.
"The tax on eigencies in increased, hose weighing ever three pounds per housand, from \$3 to \$3.50 and those veighing less, from \$1 to \$1.50.

# To Prevvent Litigation

"The committee has examined theroughly all the decisions of the land of the general approbers of the last fifteen coars interpreting the meaning of the anguage of the tariff laws and has maned the language of the various aragraphs to meet these decisions. It is hoped that it will prevent much litigation and will in the future give the courts a clear understanding of the inention of Conniess.

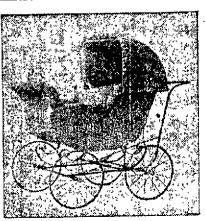

"The bill conturs a carefully prepared section (Section 29) extending the privileges of drawback on material imported on which tariff has been paid and he products of which are manufactured in this country when exported. It is refleved that this section carofully guards the revenue and at the same line liberalizes the provision and will stimulate our export trade.

"It is provided that the bill shall gento effect the day following the eractment."

# History of the Case

History of the Case

The facts in the Mies case are very peculiar from a criminal point of view. Miles was arrested and charged with assulting Mis. Carrie Wilty, wife of E. Welly, foreman of the Ohina vinevard, located two miles from Livermore. Ite bad been discharged by Welty, in retaliation for which he threatened to "get even" with the foreman.

Miles left the vinevard and was driven into Livermore by the vinevard courbinan, where he purchases a ticket for San Francisco, leaving for that place at 500 o'clock in the evening. The alleged assault upon Mrs. Welty was committed into bottom the trial of Mile that the fitter was her assailant. She chimned that at the time of the sault surd was thrown into her eyes and she was dragged from the horse she was riding into the bottom of a divercele bed and there made the steam of the alleged attempted assault. Yet the day following this freddent, when seen by the officers of the law, she was not abla to state pesitive that Miles was her assailant, although she lived known him as a backsmith on the vinevard.

Miles produced the clock, porter and clocator man of the Denve lodging house In San Francisco, who to lifed teat the accused man called at the hot I between accused man called at the hot I between the hours of 10 and 12 oclock of the might on which the attempted assault apon Mrs. Welty was climed to have been made, and secured a norm. # St. Patrick's Day in Ireland.

Today for the first time St. Patrick's Day is being celebrated in Ireland as a national holiday. At last the British Parliament has established as a legal holiday the day it was a crime to celebrate with any public demonstration a century ago. It is almost incredible that men and women were jailed less than a hundred years ago for wearing a sprig of shamrock in their hats and bonnets; that long | 000 acres of marsh lands for which the Natomas Consolidated of Caliterms at penal servitude were the penalty of singing "Wearing of the forma, organized by ex-Lieutenant-Governor Alden Anderson and Green" in public places, and that every expression of the sentiment of Irish nationality was sternly repressed. Thank God, those cruel days are over! Their memory, however, serves to give light and color, by contrast, to the freedom now enjoyed by the Irish people.

The ceaseless agitation begun by O'Connell and continued by Parnell and John Redmond has at last borne fruit. The barbarous laws which destroyed Ireland's commerce and industry, repressed the spirit of nationality, and reduced the mass of the people to beggary and despair have been repealed; and now the unhappy island once more enjoys the blessings of local self-government, the right of public assemb age and the untrammeled expression of national aspiration. But while tardy recognition of the wrongs inflicted on Treland has brought about measures of amelioration of the shocking conditions produced by centuries of misgovernment and tyranny, and laws by which the land is once more being returned to the impoverished peasantry, the evil results of a long course of persecution and repression still afflict Erin. The flower of her population has been driven into exile, and the island today contains searcely half the number of people it contained in 1840.

The strongest and best of a hardy, brave and virile stock has gone to people the United States, Canada and Australia, and today - too large a proportion of the population of Ireland is composed of weak, aged and infirm. The traveler through Ireland notes the predominance of women and old people. The young, vigorous and enterprising have gone to other lands where opportunities are larger and love of freedom and race aspiration are not under ban.

Ireland, like Niebe, has been bereft of her children, and the joy with which her people celebrate with the sanction of law a holiday long prohibited by cruel statutes, is saddened by pathetic reminders of the rigors and sufferings of the past. Wide expanses of sheep pastures spread where once stood populous villages, and tell the story of evictions which drove their inhabitants over sca and depopulated the land; the silent factories, decaying wharves and unused warehouses of Galway, Limerick. Waterford and Drogheda remain as mute historians of a melanchoix period of wrong and oppression.

But the world moves and the sentiment of the civilized world has at last lifted the pall from Ireland. St. Patrick's Day has been declared a legal holiday, and the shamrock is the official badge of the Irish regiments in the British army. Robert Emmet's birthday is publicly celebrated, and the memory of Horne Took honored as that of a patriot. From the Cove of Cork to the Giant's Causeway religious liberty prevails, and the band plays "Wearing of the Green" as vestments in realty. The Oakland Real Estate Association's delea national air without fear of infermers and constabulary. The Irish people are once more free, but alas they are but a remnant in the land of their fathers; the bulk of the brain and brawn of the race dwells to meet here this year. under other skies in other lands, but the exiles and their descendants will today send a hearty and loving greeting to their kindred across the sea while they are celebrating the national anniversary under brighter auspices and with rising hopes for the future.

# Good Roads Movement Spreading.

The Marysville Appeal is strongly opposed to a resolution adopted by the Butte County Board of Supervisors closing the county roads to all other kinds of vehicles except spring wagons. The object of the foolish resolution is to exclude automobiles. This exclusion is said to have been adopted in retaliation to an automobile map which has I cen issued warning autoists to avoid Marysville. Presumably the compilers of the map had discovered that the Butte Supervisors have neglected to keep the county roads in good repair. part of our continental soil where San | The plague of rate has been spe-Autoists are enthusiastically avorable to good road construction, and they never fail to advertise far and wide the counties that provide them. They have been the strongest supporters of the "good roads movement" from the start. Until automobiles were introduced demonstrations of the Wright broths free all ships, steam or sailing, of the most of the interior counties were, in fact, content with "natural" roads, regardless of the waste to horseflesh and the excessive cost of hauling crops to market. Autoists demonstrated the economy of good highways to all kinds of road vehicles, whether propelled by animals or any other motive power.

The propaganda for good roads has consequently grown apace The Appeal cites as an instance of the progress which the good roads movement's making that Sacramento last year voted \$100,000 toward the construction of permanent roads to and from that city and neighboring communities. Since then the building of macadamized roads of the most substantial order has been started through the county. These reach out to Folsom, Stockton and Auburn. A contract has just been awarded, in fact, for the construction of fourteen miles of the Auburn road at a cost of \$100,000. The substantial character of the roadbed is thus described:

"The specifications call for the road to be carefully graded, crowned and drained, having concrete culverts. The road will have cant details. a layer of one and one-half inch mesh crushed rock, which must be rolled, then a layer of heavy or three-inch rock is put in and on top of this is put some smaller crushed rock as a binder. This is then heavily oiled and the whole is rolled and rolled. Then a dressing of rock screenings is put on. This last dressing is oiled and rolled with a heavy roller. The rock is finally one foot deep. This makes a road a neavy rotter. The rock is many one toot deep. This makes a road comfortable you can be traveling that will last for 100 years. The road has been made sixteen feet abroad is how many other fools are wide and is now being widened to twenty feet."

That means a roadbed like that the Romans built in Britain during their occupation of the island. Under constant attention these Roman roads have survived the wear and tear of the heaviest kind of traffic for over a thousand years. They are kept in good repair, also, at a nominal cost. The Sacramento method of county road construction trys a good foundation for the development of a system of public highways which will endure for all time, if properly cared for.

San Joaquin is squarely in the line of progressive counties, for at yesterday's election it voted almost solidly to bond itself for \$1,800,000 to build two hundred and thirty-eight miles of macadamized roads from Stockton to various points on the neighboring county lines. The authorization of this large bonded indebtedness Afor highway construction establishes a new record. It is claimed to be the largest county bond issue ever voted for good roads , by any county in the United States, population and the aggregate vassessed valution of property being considered.

# Big Tule Land Reclamation.

One of the higgest reclamation enterprises ever privately undertaken in California is in a Tair way of Being carried. The project contemplates the reclamation of the tide lands on the east side of the Sacramento river from the north bank of the American river to the south bank of Bear river, and its preparation for intensive cultivation. In its present form the scheme embraces an area of about 54,his associates, has agreed to pay approximately \$1,000,000. The payment on Monday of the first installment of \$250,000 due is an assurance that the enterprise will be carried out in accordance with the provisions of an enabling act passed by the Legislature two years ago. Owners of marsh land lying north of the property of the Natomas Consolidated are now asking to be taken into the district. It is anticipated, therefore, that the area to be reclaimed will ultimately comprise 85,000 acres

The enterprise has been projected, of course, as a private speculation with the reasonable expectancy that a vast profit will be made inally out of the many millions of dollars which it is planned to exbend in leveeing, bonleyarding, parking, road laying and the development of a complete irrigation system. Incorporated in the scheme is the settlement of the reclaimed land with Hollanders who are experts in the utilization of just such territory. But apart from the private speculation the enterprise will doubtless inure immensely to the benefit of the State. 'The conversion of over eighty thousand acres of what is today waste and into a highly productive territory yielding untold nullions annually to the general wealth of the people is a subect of the greatest interest to the commonwealth at large. We have an example of what such a change means in the Imperial Valley, where a new, rich, populous and prosperous county has been created out of a corner of the great waste known as the Colorado desert Moreover, the scheme of reclamation, if carried out on the lines of which it has been projected, will be a long step toward the solution of the problem of controlling the flood waters of the Sacramento river and its tributaries. It points the way for the redemption of the west side of the stream, where there remains a large area susceptible of reclamation. The simultaneous treatment of the stream by the cooperative efforts of the State and Federal governments will complete the triumph of human effort against the destructive forces of Nature and make the Sacra nento basin more productive than the worldfamed delta of the N le in Lower Egypt.

Tonight the Oalland Real Estate Association will set the date for the annual convention of the State Realty Federation which will be held in this city this year. It is an event and a gathering of the greatest importance to Oakland's future interests. Realty experts from all parts of the State will be present at the convention and many of them will get a chance for the first of familiarizing themselves with the concitions existing here—the extraordinary growth in the last three years of population, private and public improvements, industrial and commercial developments and the splendid opportunities which the city and its suburbs offer for profitable ingates at the last annual convention of the State Federation scored a great triumph when they succeeded in persuading that organization

Patriotic Addresses Delivered by Church Dignitaries and Irishmen of Prominence---Tonight's Festivities.

In deference to the memory of the patron saint of Ireland appropriate ccremonies are being held today in all the Catholic churches of this city. Fitting services with special musical piograms have been arranged to commemorate the birth of St Patrick The religious services began early this morning with solemn high mass and the significance of the day was expounded in sermons. In all the houses of worship the event is looked upon as an important one and a keen interest is displayed by the Sons of Erin

If the board does not act carnestly in the matter at once the people will desand the reason why.

The record of the construction since the first contract for the new fireproof building originated, intended to cost \$160,000, with let on September 18, 1905, shows the process thind of official carelessness and disregard of the interests of the public it abounds in building unpervision faulty architectural engineering and extrivaginees in meany expendiand extring irons to money expendi-lines. The result is that the original contract price has now been exceeded by \$20,000 with the present indication that probably as much more will be piled upon the cost before the building is ready for

Aside from the other scandalous confittions which have arisen from misman-agement of the contract, this additional burden upon the taxpavers is a feature which the sublic seems to resent with justifiable in dignation.

# Much Time Lost

It requires from the date of the contract until April 18, 1996, for the contract to get the steel beams of the first story of the schoolhouse in place. Then came the carthquake which shattered this superstructure so badly that it had to be invested and the old plans shandoned or new ones for an earthquake—as well as a fire-proof—building.

Again many months were filted away by the Board of Education, because it as not until the fellowing December that the decided to award a new contract for reconstruction on the revised plans. Then the count called his name he rose to his feet, said he had been in fall for ten months, and wanted to be minutedately tried on the charge against him.

# JOHNSON FORCES JEFFRIES TOO MUCH TO PLEASE FANS

Big Fellow Should Come Back and Talk a Little Fight Before Johnson Pushes Him Into Corner.

By EDDIE SMITH.

Now that the big fighters of whom so much has been written of late are finally both within the confines of the little village of New York, it is high time that something be done regarding a match between them or the truth be told regarding the motives of Jim Joffries. Since Jack Johnson has landed here the scribes have been a trifle hard on the big black, for they have accused him of having the swell head and of being this and that, but at the same time, had he been a little more backward about unnouncing he willingness to fight Joffries the story would have been published broadcast that he was afruid of the big white man so you see Jack was between the devil and the sea from the start. If he had aunounced that he might fight Joffries under certain conditions he would have been accused of being afraid. Instead of that, however, he announced that he would beat Joff to a frazzle and that he was willing and anylous to meet him. Now just for that he has the iat head.

# CURED OF CATARRE.

Dear Sirs:—At the age of two years I contracted a bad case of Calarin II began with a prefuse watery discharge from my nove. The matter failing into my throat kept mo constantly hawking and spatting, and my breath, too, was fearfully oftens ve, but S.S. S. has cared me sound and well of the Catarih and I cheerfully recommend it to the public

when I beg in taking S. S. S. It was for another disease which the doctricalled Tuberculosis of the bone, and since I began the use of your remedy, S. S., four of the five tubercles have healed and I feel as well as I over did in my lite.

OSCAR WARE. life. 4516 Garfield Ave., Kansas City, Mo.

LOST HIS VOICE.

I suffered a verely with Catairb for a number of years and for eighten months the disease was so bad that lost my voice in consequence of it. I three various treatments and doctors and with finally given up to die. I then took S. S. S. according to directions and not course of time my tatairb wis entirely cured. My voice was restored and I have only yed good health ever since.

W. H. GRIFFIN.

CHEERFULLY RECOMMENDS S. S. S. CHEERFULLY RECOMMINDS S. S. S.

For the par, twenty-live years I have been in the habit of taking a course of S. S. S. every spring as a blood purifier, and have tiways been well pleased with the results. I had Ctainh in a number of years which was cured by S. S. S. I cheerfully recommend S. S. S. as the best blood purifier or earth. Not only did it come my Catant but I have known of its being used in other cases with eatherly setting typic yessels.

very bottom of the trouble in the blood, and makes a permanent and lasting cure. S. S. S. re noves every particle of the catarrhal matter from the circulation, me sing this v tal fluid pure, fresh and healthy. Then the inflamed member anes begin to heal, because they are nourished with pure, health-givin blood, the head is cleared, mucus stops dropping back into the 11 roat, every symptom disappears, the constitution is built up and healther restored. S. S. S. is the greatest of all blood purifiers and cures Catan health driving out the cause from the system.

Being made entirely of 1 ealthful vegetable ingredients S. S. S. does not contain any habit forming drugs, which really do not cure Catarrhebut often ruin the healthem or will S. S.
